

Table of Contents

Introduction

Chapter 1 Preventive Medicine/Overview.....1-3

1.0 Colony Monitoring Procedures.....	1
1.1 Feed.....	1-2
1.2 Record Keeping.....	2
1.3 Sanitation.....	2-3
1.4 Fish Importation.....	3

Chapter 2 Basic Genetics.....4-9

2.0 Genetics.....	4
2.1 Genetic Inheritance of Gametes and Embryos.....	5
2.2 Intercross.....	5-6
2.3 Identifying Carriers.....	6-7
2.4 Propagating and Maintaining Fish Lines.....	8
2.5 Labeling Fish Tanks.....	9

Chapter 3 Spawning.....10-17

3.0 Spawning.....	10
3.1 Netting Fish.....	11
3.2 Transferring Fish During Spawning.....	12
3.3 Sexing Fish.....	12
3.4 Types of Crosses.....	12-13
3.5 Labeling Spawning Traps.....	13
3.6 Spawning Shelves.....	13
3.7 Collecting Embryos.....	13-14
3.8 Collecting Embryos for Microinjections.....	14
3.9 Holding Fish Off-system.....	14
3.10 Dirty Spawning Traps.....	15
3.11 Incubator.....	15
3.12 Spawning Troubles.....	15
3.13 In-vitro Fertilization.....	15-16
3.14 Squeezing Fish.....	17
3.15 Anesthetizing Fish.....	17
3.16 Chorion Removal.....	17
3.17 Fin Clipping.....	17

Chapter 4 Nurseries and Cultures.....18-26

4.0 Fish Nursery.....	18
4.1 Adding Fish to the Nursery.....	18-19
4.2 Juvenile Fish.....	19
4.3 Shaker Food.....	19
4.4 Artemia Culture.....	20-21
4.5 Disinfecting Artemia Hatcheries.....	21
4.6 Paramecium Culture.....	22
4.7 Pellet Stock.....	22-23

4.8 Stock Culture.....	23
4.9 Bottle Culture.....	23
4.10 Adding Vitamins To The Cultures.....	23-24
4.11 Assay Paramecium Density, Purity and Health.....	24
4.12 Tub Culture.....	25
4.13 Paramecium Processing.....	25
4.14 Feeding Paramecium.....	26
Chapter 5 Environmental.....	27-36
5.0 Environmental.....	27
5.1 Photoperiod.....	27
5.2 Temperature.....	27
5.3 RO and System Water.....	28
5.4 Water Quality.....	29-32
5.5 Maintaining Water Quality.....	32-33
5.6 Acclimating Biofilters.....	34
5.7 Water Quality Parameters.....	35
5.8 Water Quality Testing.....	35
5.9 Water treatments.....	36
Chapter 6 Fish Systems.....	37-64
Overview, Maintenance, Tank Use, Tank Cleaning, Water Quality Safety Features and Emergency shutdown	
6.1 Daily Maintenance.....	37
6.2 Aquatic Habitats.....	38-42
6.3 Aquaneering.....	43-46
6.4 Zebrafish Modular.....	47-51
6.5 J Big System.....	52-56
6.6 Nurseries.....	57-59
6.7 First Generation (F1) System.....	60-61
6.8 Water Towers.....	62
6.9 Disinfecting Filters.....	62
6.10 Ultraviolet Water Sterilization.....	63
6.11 Stocking Densities.....	64
Chapter 7 Fish Health.....	65-69
7.0 Overview.....	65
7.1 Fish Diseases & Inspections.....	66
7.2 Hereditary and Environmental Diseases.....	66-67
7.3 Diseases Caused by Pathogens.....	68-69
7.4 Sick Fish Protocol.....	69
7.5 Euthanizing Fish.....	69
7.6 Dead Animal Storage.....	69

Chapter 8 Duties of Zebrafish Staff.....	70-77
8.1 Organization of Staff.....	70-71
8.2 Zebrafish Lab Technician Check List.....	72-76
8.3 Feeding.....	76
8.4 Washing Dishes.....	77
8.5 Autoclaving.....	77
Chapter 9 Quarantine Room.....	78-85
9.0 Introduction.....	78
9.1 Fish Importation Overview.....	78-79
9.2 Surface Disinfecting Embryos.....	79
9.3 Water Tower & Flow-through System.....	79-83
9.4 Q-Room Tasks.....	83-85
9.5 Q-Room Feeding.....	85
Chapter 10.....	86-87
10.1 Pest Control.....	86
10.2 Emergency Procedures Power and Water.....	86-87
Appendix A -Sperm Cryopreservation	
Appendix B – Zebrafish egg development	
Appendix C – Fish Facility Forms & Checklists
