

## Configuring Pine: Avoiding Accidental Deletion of Sent-Mail<sup>1</sup>

If you login to homer or dante at the UW and use Pine (current version is 4.4) to access your e-mail at the University of Washington, this document may help you.

At the beginning of each month, Pine is configured so that it will ask you if you want to rename sent-mail files, and delete old ones. Hitting return implies "yes". Because of this, some people have inadvertently deleted important sent-mail files. This document will show how to change this configuration in UNIX pine. Changing this configuration on UNIX Pine will also change your configuration on WebPine

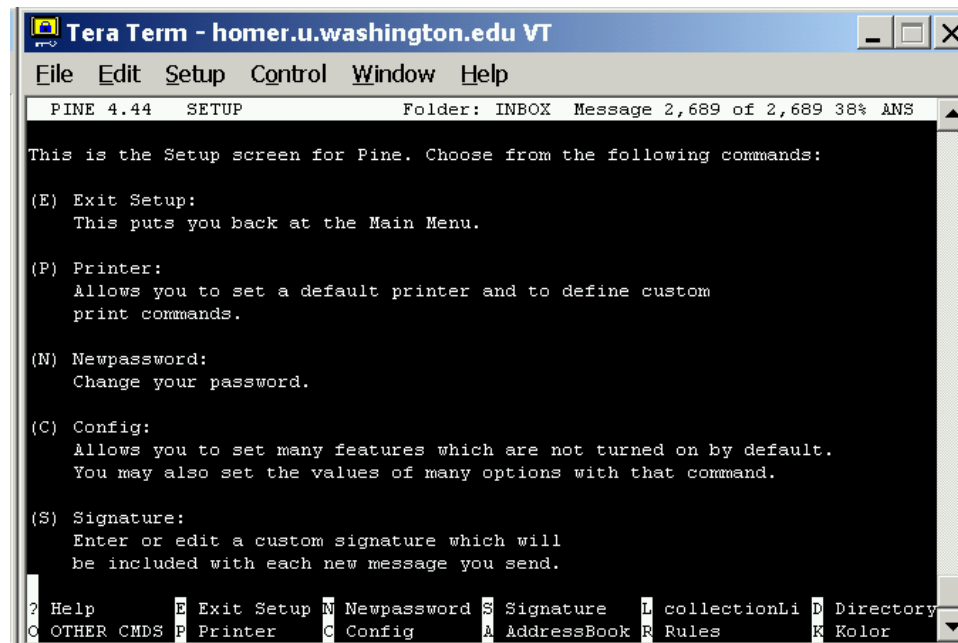

Get to the Pine screen that looks something like this. Go to Setup, and hit return.

```
Tera Term - homer.u.washington.edu VT
File Edit Setup Control Window Help
PINE 4.44 MAIN MENU Folder: INBOX 2,689 Messages
? HELP - Get help using Pine
C COMPOSE MESSAGE - Compose and send/post a message
I MESSAGE INDEX - View messages in current folder
L FOLDER LIST - Select a folder OR news group to view
A ADDRESS BOOK - Update address book
S SETUP - Configure Pine Options
Q QUIT - Leave the Pine program

C OTHER CMDS [Setup] N NextCmd K KLock
```

The following screen will appear. Hit the "c" key for Configure.

```
Tera Term - homer.u.washington.edu VT
File Edit Setup Control Window Help
PINE 4.44 SETUP Folder: INBOX Message 2,689 of 2,689 38% ANS
This is the Setup screen for Pine. Choose from the following commands:

(E) Exit Setup:
    This puts you back at the Main Menu.

(P) Printer:
    Allows you to set a default printer and to define custom
    print commands.

(N) Newpassword:
    Change your password.

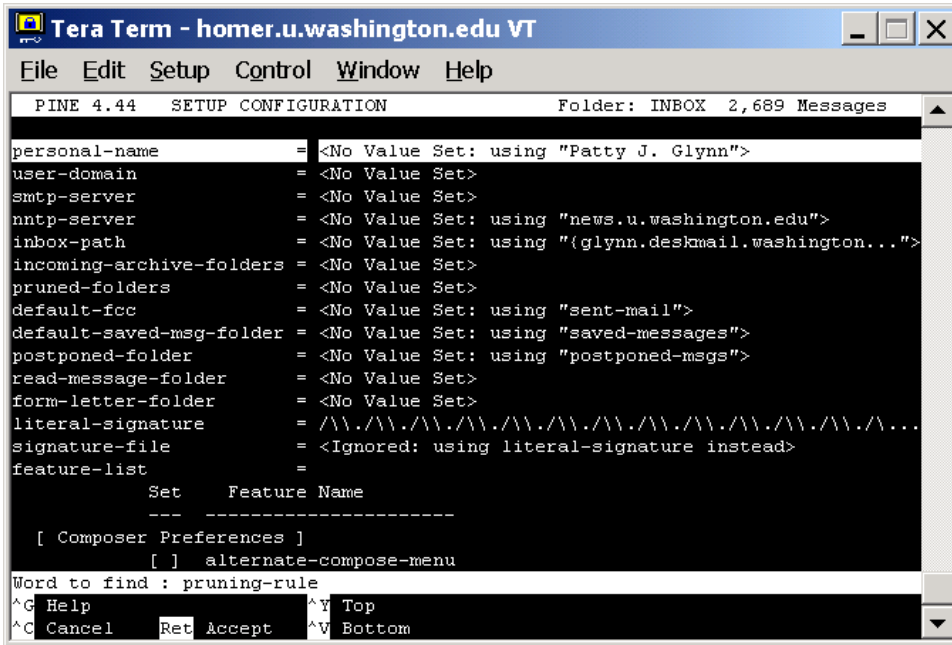

(C) Config:
    Allows you to set many features which are not turned on by default.
    You may also set the values of many options with that command.

(S) Signature:
    Enter or edit a custom signature which will
    be included with each new message you send.

Hold down the Ctrl key and press W for search. Type in pruning-rule and hit return.

This will take you to the part of the configuration where you can make choices about renaming and deleting files. Put an asterisk by the option you want to choose. Then type E to exit setup, and Y to save the changes.
