Soft Tissue Infections

Our Team

Registered nurses and physical therapists provide comprehensive evaluations of wounds and their underlying causes. Social workers, occupational therapists, dietitians, and pharmacists contribute additional expertise. We work carefully with the patient's physician to create an appropriate, effective healing plan.

The Technology

Oxygen saturation and Doppler assessments assist accurate diagnosis.
Pulsavac Wound Care System promotes healing without whirlpools.
New generation dressings achieve maximal wound management in minimal time.

Accepting referrals from
