Overall Summative Rating represents the combined responses of students to the four global summative items and is presented to provide an overall index of the class's quality:

Median	College Decile
4.7	7
(0=lowest; 5=highest)	(0=lowest; 9=highest)

Challenge and Engagement Index (CEI) combines student responses to several *IASystem* items relating to how academically challenging students found the course to be and how engaged they were:

CEI: 5.8
(1=lowest; 7=highest)

STANDARD OPEN-ENDED QUESTIONS

Was this class intellectually stimulating? Did it stretch your thinking? Why or why not?

2. The lab activities were excellent, though not directly correlated with the coursework in the lectures. The RC analysis should have been done in BEE215. Instead of using Op-Amps for selective filters, simple capacitors and inductors could have been used.
3. This class was intellectually stimulating. It expanded on the course, BEE 215.
4. This lab section was very intellectually stimulating as I had to apply new thinking in order to obtain data
5. yes good labs following the lectures
6. yes ,
9. Yes, the labs were really good and challenges.
10. Yes. It was exciting to view class topics through the ocsilliscope.

What aspects of this class contributed most to your learning?

2. The combination of hands-on and theoretical work best contributed to my learning. It was also very helpful to have had experience with the equipment prior to coming to this course.
3. The hands on application of this class contributed most to my learning.
4. Building the circuits and using the instruments
5. the lab assignments were fair and good to learn
6. his teaching style
7. The analysis of the various circuits helped me in both lecture and lab (in terms of applying).
8. Great explanations and briefings before starting the lab.
9. The pre-labs. It helped me a lot.
10. Creating circuits on multisim and logisim.

What aspects of this class detracted from your learning?

3. The fact that it wasn't very related to the course, BEE 233.
4. nothing
5. however they were too long
6. nothing
9. -
10. N/A/

What suggestions do you have for improving the class?

1. Coordinate better with topics taught in lecture.
2. My only suggestion is providing feedback to the students in a more timely manner. Only one lab report was returned prior to finals week -- so it was difficult to improve without knowing what needed improvement.
3. A higher level of clarity in the procedures in the lab.
4. More clear instructions
5. keep the labs subject but make them shorter.
6. no need
8. I thought things went very smoothly the way they were this quarter.
