IASystem
The Course Evaluation Standard

B EE 271 AB
Digital Circuits And Systems
Course type: Face-to-Face

Taught by: Nicole Hamilton
Instructor Evaluated: Nicole Hamilton-Lecturer

Evaluation Delivery: Online
Evaluation Form: H
Responses: 8/22 (36% moderate)

Overall Summative Rating represents the combined responses of students to the four global summative items and is presented to provide an overall index of the class's quality:

Median	College Decile
4.9	**9**
(0=lowest; 5=highest)	(0=lowest; 9=highest)

Challenge and Engagement Index (CEI) combines student responses to several *IASystem* items relating to how academically challenging students found the course to be and how engaged they were:

CEI: 6.7
(1=lowest; 7=highest)

SUMMATIVE ITEMS

	N	Excellent (5)	Very Good (4)	Good (3)	Fair (2)	Poor (1)	Very Poor (0)	Median	DECILE RANK Inst	DECILE RANK College
The lab section as a whole was:	8	88%	12%					4.9	9	9
The content of the lab section was:	8	88%	12%					4.9	9	9
The lab instructor's contribution to the course was:	8	88%	12%					4.9	9	9
The lab instructor's effectiveness in teaching the subject matter was:	8	88%	12%					4.9	9	9

STUDENT ENGAGEMENT

Relative to other college courses you have taken:	N	Much Higher (7)	(6)	(5)	Average (4)	(3)	(2)	Much Lower (1)	Median	DECILE RANK Inst	DECILE RANK College
Do you expect your grade in this course to be:	8	62%	25%		12%				6.7	9	9
The intellectual challenge presented was:	8	75%	25%						6.8	9	9
The amount of effort you put into this course was:	8	75%	12%		12%				6.8	9	9
The amount of effort to succeed in this course was:	8	88%	12%						6.9	9	9
Your involvement in course (doing assignments, attending classes, etc.) was:	8	88%			12%				6.9	9	9

On average, how many hours per week have you spent on this course, including attending classes, doing readings, reviewing notes, writing papers and any other course related work?

Class median: 12.5 (N=8)

Under 2	2-3	4-5	6-7	8-9	10-11	12-13	14-15	16-17	18-19	20-21	22 or more
		25%			12%	25%	12%		25%		

From the total average hours above, how many do you consider were valuable in advancing your education?

Class median: 9.5 (N=8)

Under 2	2-3	4-5	6-7	8-9	10-11	12-13	14-15	16-17	18-19	20-21	22 or more
		12%	25%	12%	12%	12%	12%		12%		

What grade do you expect in this course?

Class median: 3.5 (N=8)

A (3.9-4.0)	A- (3.5-3.8)	B+ (3.2-3.4)	B (2.9-3.1)	B- (2.5-2.8)	C+ (2.2-2.4)	C (1.9-2.1)	C- (1.5-1.8)	D+ (1.2-1.4)	D (0.9-1.1)	D- (0.7-0.8)	E (0.0)	Pass	Credit	No Credit
12%	38%	38%				12%								

In regard to your academic program, is this course best described as:

(N=8)

In your major	A core/distribution requirement	An elective	In your minor	A program requirement	Other
100%

STANDARD FORMATIVE ITEMS

	N	Excellent (5)	Very Good (4)	Good (3)	Fair (2)	Poor (1)	Very Poor (0)	Median	DECILE RANK Inst	College
Explanations by the lab instructor were:	8	88%	12%					4.9	9	9
Lab instructor's preparedness for lab sessions was:	8	88%		12%				4.9	9	
Quality of questions or problems raised by the lab instructor was:	8	88%		12%				4.9	9	9
Lab instructor's enthusiasm was:	8	100%						5.0	9	9
Student confidence in lab instructor's knowledge was:	8	88%	12%					4.9	9	9
Lab instructor's ability to solve unexpected problems was:	8	100%						5.0	9	
Answers to student questions were:	8	88%	12%					4.9	9	9
Interest level of lab sessions was:	8	88%	12%					4.9	9	
Communication and enforcement of safety procedures were:	8	100%						5.0	9	
Lab instructor's ability to deal with student difficulties was:	8	88%	12%					4.9	9	9
Availability of extra help when needed was:	8	100%						5.0	9	9
Use of lab section time was:	8	88%	12%					4.9	9	9
Lab instructor's interest in whether students learned was:	8	88%	12%					4.9	9	9
Amount you learned in the lab sections was:	8	88%	12%					4.9	9	9
Relevance and usefulness of lab section content were:	8	88%	12%					4.9	9	9
Coordination between lectures and lab activities was:	8	88%	12%					4.9	9	
Reasonableness of assigned work for lab section was:	8	88%	12%					4.9	9	9
Clarity of student responsibilities and requirements was:	8	88%	12%					4.9	9	9

STANDARD OPEN-ENDED QUESTIONS

Was this class intellectually stimulating? Did it stretch your thinking? Why or why not?

1. Yes, this class was very intellectually challenging I spent many hours on code and it was very difficult to understand the verilog language.

2. This class was intellectually stimulating. I had to pay a lot of attention to detail and understand many concepts.

3. Labs were a challenge! They definitely require a lot of pre-lab thought and planning, but overall great projects to figure out.

4. yes it did, it helped my knowledge of programming in verilog.

5. Yes. Had alot of problems to solve.

6. absolutely, I had no idea what digital logic was, very interesting. so much for thinking binary was simple and Boolean algebra was simple

7. She's a great person

What aspects of this class contributed most to your learning?

1. Team work and our study group.

2. The professor was quite helpful.

3. Spending time reviewing the lecture slides helped out a lot. Everything I needed to complete the labs could be found either in the lecture material, or in the book.

4. the way the professor challenged me to go out and figure out mostly by myself how to solve the labs.

5. The labs

6. reading, lab, lectures

7. Learned valuable lesson.

What aspects of this class detracted from your learning?

1. We need more help in lab sections, because there were many times where people were waiting in line for help.

2. Noting detracted from my learning.

3. Snow Days

4. The amount of time I had to put in this class. It weighs like a 400 level class. very challenging that it was hard to make time for other classes

5. Nothing

6. missed Mondays for holidays and snow

What suggestions do you have for improving the class?

1. You should add more examples of verilog code being written. It would be nice if there was a in class typing code demonstration explaining what is taking place as the code is being written.

2. No suggestions

3. Well, nothing really. Students are expected to keep going with the pace of the class. If they find the time they need to figure out the labs, they will do well in this class. If not, its their loss.

5. Take out the first lab

6. nothing great class

IASystem Course Summary Reports summarize student ratings of a particular course or combination of courses. They provide a rich perspective on student views by reporting responses in three ways: as frequency distributions, average ratings, and either comparative or adjusted ratings. Remember in interpreting results that it is important to keep in mind the number of students who evaluated the course relative to the total course enrollment as shown on the upper right-hand corner of the report.

Frequency distributions. The percentage of students who selected each response choice is displayed for each item. Percentages are based on the number of students who answered the respective item rather than the number of students who evaluated the course because individual item response is optional.

Median ratings. *IASystem* reports average ratings in the form of item medians. Although means are a more familiar type of average than medians, they are less accurate in summarizing student ratings. This is because ratings distributions tend to be strongly skewed. That is, most of the ratings are at the high end of the scale and trail off to the low end.

The median indicates the point on the rating scale at which half of the students selected higher ratings, and half selected lower. Medians are computed to one decimal place by interpolation.[1] In general, higher medians reflect more favorable ratings. To interpret median ratings, compare the value of each median to the respective response scale: *Very Poor, Poor, Fair, Good, Very Good, Excellent (0-5); Never/None/Much Lower, About Half/Average, Always/Great/Much Higher (1-7); Slight, Moderate, Considerable, Extensive (1-4).*

Comparative ratings. *IASystem* provides a normative comparison for each item by reporting the decile rank of the item median. Decile ranks compare the median rating of a particular item to ratings of the same item over the previous two academic years in all classes at the institution and within the college, school, or division. Decile ranks are shown only for items with sufficient normative data.

Decile ranks range from 0 (lowest) to 9 (highest). For all items, higher medians yield higher decile ranks. The 0 decile rank indicates an item median in the lowest 10% of all scores. A decile rank of 1 indicates a median above the bottom 10% and below the top 80%. A decile rank of 9 indicates a median in the top 10% of all scores. Because average ratings tend to be high, a rating of "good" or "average" may have a low decile rank.

Adjusted ratings. Research has shown that student ratings may be somewhat influenced by factors such as class size, expected grade, and reason for enrollment. To correct for this, *IASystem* reports **adjusted medians** for summative items (items #1-4 and their combined global rating) based on regression analyses of ratings over the previous two academic years in all classes at the respective institution. If large classes at the institution tend to be rated lower than small classes, for example, the adjusted medians for large classes will be slightly higher than their unadjusted medians.

When adjusted ratings are displayed for summative items, **relative rank** is displayed for the more specific (formative) items. Rankings serve as a guide in directing instructional improvement efforts. The top ranked items (1, 2, 3, etc.) represent areas that are going well from a student perspective; whereas the bottom ranked items (18, 17, 16, etc.) represent areas in which the instructor may want to make changes. Relative ranks are computed by first standardizing each item (subtracting the overall institutional average from the item rating for the particular course, then dividing by the standard deviation of the ratings across all courses) and then ranking those standardized scores.

Challenge and Engagement Index (CEI). Several *IASystem* items ask students how academically challenging they found the course to be. *IASystem* calculates the average of these items and reports them as a single index. *The Challenge and Engagement Index (CEI)* correlates only modestly with the global rating (median of items 1-4).

Optional Items. Student responses to instructor-supplied items are summarized at the end of the evaluation report. Median responses should be interpreted in light of the specific item text and response scale used (response values 1-6 on paper evaluation forms).
