

HUMAN DIMENSIONS OF THE URBAN FOREST & URBAN GREENING
Project Briefing & Progress Report

Green Cities :: Good Health
Literature Review on Human Health & Well-Being

PI & Editor: Kathleen Wolf, Ph.D.; University of Washington

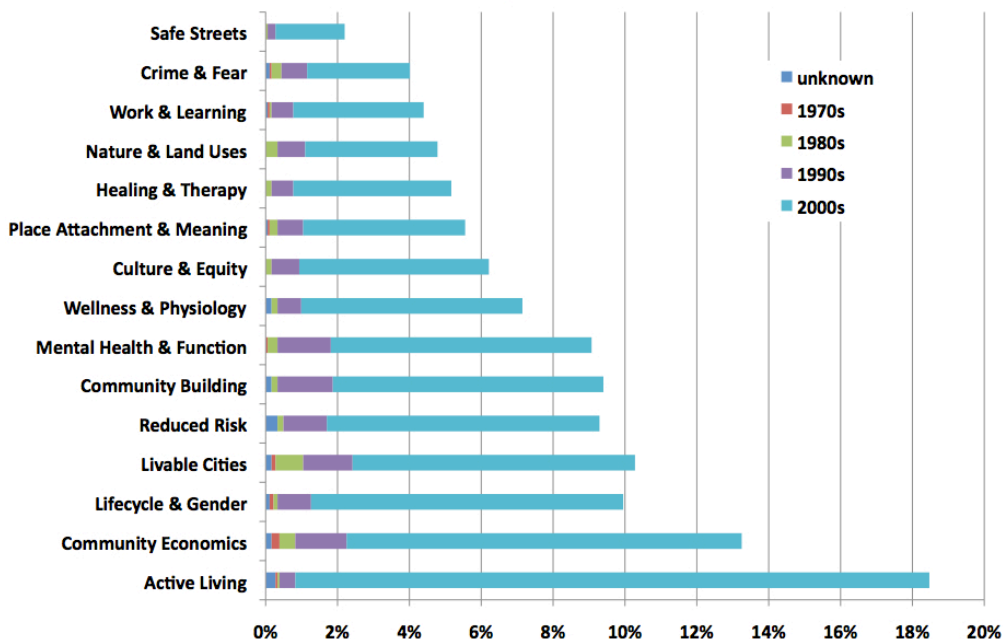

BUILDING ON 40 YEARS OF RESEARCH . .

The scientific publications about the role of urban greening in human health and well-being are being collected and summarized to provide evidence-based tools. The article collection has been sorted by themes to prepare a set of web-based summaries. All are available on a web site:

<http://www.greenhealth.washington.edu>

1,706 articles :: distribution by benefits theme

WHAT'S NEXT?

The web-based summaries provide content for additional outreach products that are now in development.

- briefing sheets
- powerpoint
- YouTube clips
- PSAs?

develop search capability in the web site

explore economic valuation approaches

begin development of an i-Tree Community benefits analysis tool

PROJECT SUPPORT PROVIDED BY:

USDA Forest Service, Urban & Community Forestry;
National Urban and Community Forestry Advisory Council
American Reinvestment and Recovery Act of 2009
